Ink Train Warranty

INX Digital offers the most comprehensive warranty in the industry. If inks are proven to be the cause of the printer breakdown during the initial OEM warranty period, then INX Digital will provide parts, service or reimbursement costs required to repair damage to the ink train.*

*See warranty disclosure statement for details.

1 Year Durability

Our one year durable product is intended for short term outdoor graphics and is expected to last up to one year depending on ambient conditions. To better match the needs of specific markets, certain TRIANGLE® inks are now available in a one year durability level. These inks are for use with outdoor graphics which will not be outdoors for more than one year. These inks are not covered by INX Digital's Worldwide Outdoor Durability Warranty.

INX Digital is employing a new, patent-pending technology, proving that up to 100% recovery on UV print heads with obstructed nozzles and restricted flow is possible. This advance in print head cleaning, available for virtually all print head types, translates to major savings for digital print operations.

Spare Parts

INX Digital offers common replacement parts (at a significant savings over the OEM) for many of the printers that it manufactures ink for. These parts are the same parts that are sourced by the manufacturers themselves, refurbished, or are re-sourced to solve known problems.
